Connexionz Newsletter

Quarter 4, 2023

We're excited to share our latest newsletter with you!

Staff risk their lives in the line of duty

Gatlinburg, Tennessee is a mountain resort city in Tennessee. It's a popular vacation resort, as it rests on the border of the Great Smoky Mountains National Park along Route 441.

It has a population of around 4,000 but approximately 14 million people visit Gatlinburg each year.

We've been installing our system for the City of Gatlinburg and the project is progressing according to plan. However, we were a little spooked when bears came to visit the vehicles while we were working! The police were called, and they kept a close eye on them until the bears lost interest and moved on.

Winners are grinners!

Congratulations to Marcita Enis at Golden Gate Bridge, Highway and Transportation District who won our prize draw for a Garmin smartwatch.

We had a great time at the California Transit Association conference. There were some great workshops, fantastic presentations, and lots of interest.

It was a splendid platform for showcasing innovative products and services. It was engaging and efficiently managed. Good job CTA!

Timeview gives Connexionz the capability to provide off-vehicle signage to any transit agency with a GTFS feed

Giving our customers a better standard of presentation for their off-vehicle LCD panel signage and giving our Customer Success Team an efficient way to install and configure these displays has been a project we've been working on.

Now we're excited to launch this new feature and allows Connexionz to provide off-vehicle signage any transit agency that has a GTFS Real Time feed.

Richard Riley appointed as Acting Chairperson

On October 12, Tony completed the last of his duties as Executive Chair, to focus on the CEO role.

Richard Riley has kindly stepped in as Acting Chairperson. The Board has recently started advertising for an additional two independent Directors, and good interest has been shown for these positions.

Merry Christmas and Happy Holidays!

This year has raced by incredibly quickly.

Nonetheless, there are tangible signs of good progress despite rising costs putting pressure on margins.

In the States, most of our team will be working through with breaks occurring on Christmas and New Year's Days.

Many of our team in New Zealand will take the opportunity to go on a well-earned break. But some of us will be working through depending on what opportunities arise.

Pictured above are members of our US team who got together for a combined Christmas and Thanksgiving dinner in Los Angeles.

Tony Kan
Executive Chair
